

Politics Cookies

revision from – 31.01.2022 r.

What are cookie files?

Cookie files are light-sized text files, which are saved on your computer, tablet or mobile phone. They don't harm a computer or a security system, and contrary to the public opinion, don't have anything common with such viruses as Trojan Horse programs. Whilst visiting a website, cookie files allow it to "remember" you and your preferences to improve the quality of interaction with a website. More detailed information about cookie files you can find on the Internet.

How can I manage the settings letting to use cookies?

If you don't want to receive cookies, you can change browser settings so that it notifies you about the receiving of these files, or discard them completely. You can also delete already saved cookies.

How we use cookies?

We use Google Analytics, web-analysis service provided by Google Inc. (Google). This service uses cookies to analyse interaction with the website in order to improve the quality of service. Our website uses so called user identifier, which serves to identify clients in Google Analytics. On the basis of your activity Google creates a profile for your user identifier. Google Analytics controls actions of unidentified users on different devices (tablets, PC, smartphones, etc.). The information about web-sites' exploitation which is collected with the help of cookies (including IP address), is transferred to Google and is kept on servers located in the USA. Google uses collected data to analyse the interaction of users with the web-site, to make reports on web-site

traffic for us, and also to render other services connected with the web-site and the Internet usage. Google can give these data to third persons, if it's required by the law or for processing on behalf of Google. Your IP-address is not connected with other data collected by Google.

Only a user identifier is provided at the Google disposal, but not the information contained in the mentioned above profile or other personal data. We have access to aggregate data of a created profile. We don't add data which can be used to identify the personality in a profile connected with a user identifier.

You can refuse from tracing by user identifier by sending us a letter at the address support@crypto-emergency.com.

You also can refuse from using cookies specifying the correspondent settings in a browser. Pay your attention that in this case some web-site settings may be unavailable. Using the web-site, you give your permission for processing your data by Google in the way described above for the purposes listed in these rules. More detailed information about using cookies you can find on the web-site <http://www.aboutcookies.org>.

Terms of users agreement

Continuing to use our web-site, you agree to place cookies on your device. If you decided to refuse from our cookie files, we can't guarantee that your visiting the web-site will be as successful as with receiving cookie files.
